## DETAILED ACTION

### *Election/Restrictions*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-2, drawn to a semiconductor device, classified in class 257, subclass 1+.
- II. Claims 3-5, drawn to a method of making a semiconductor device, classified in class 438, subclass 459.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case instead of etching to form concave-convex portions, the portions can be formed by individually laying semiconductor films on a semiconductor substrate.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2812

4. During a telephone conversation with H. Warren Burnam Jr. on 04/12/02 a provisional election was made without traverse to prosecute the invention of group I, claims 1-2. Affirmation of this election must be made by applicant in replying to this Office action. Claims 3-5 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

### ***Drawings***

5. Figures 4A-4E and 5A-5E should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Specification***

6. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2812

8. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kurtz et al. U.S. Patent 3,924,322.

Kurtz discloses a semiconductor substrate device, comprising; a first semiconductor substrate 10 including a concave-convex surface defined by a plurality of convex portions 31-35 formed at equal intervals (see figure 1D); and a second semiconductor substrate 45 having an insulating film 40 on a surface thereof, wherein the first semiconductor substrate and the second semiconductor substrate are brought together so that the surface of the first semiconductor substrate 10 and the insulating film 40 provided on the surface of the second semiconductor substrate 45 contact each other to form a cavity in the semiconductor substrate device (see figure 1F).

### ***Conclusion***

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Pogee, Warren, Slatter et al., Kurtz et al., Lur et al. and Terasawa disclose semiconductor devices comprising semiconductor layers with concave-convex portions bonded to layers thereby forming cavities in the semiconductor device.
